## 1 MARCH 2010 ANNUAL MONITORING REPORT- OAKDALE IRRIGATION DISTRICT

Thank you for submittal of the Oakdale Irrigation District (District) Annual Monitoring Report (AMR), which was received on 1 March 2010. The California Regional Water Quality Control Board, Central Valley Region (Central Valley Water Board) staff has completed a review of the AMR for compliance with Monitoring and Reporting Program (MRP) Order No. R5-2003-0827 (Order). Staff has noted that for the majority of components, the District achieved MRP Order requirements, including timely AMR submittal, use of appropriate quality control data, collecting irrigation and storm season samples, presenting data in tabular form, and site photographs. The incomplete item is summarized below and must be addressed in the next AMR. The attached memorandum provides more detail. Staff appreciates the District's effort to meet the requirements of the Order, such as addressing the comments provided for the previous (2009) AMR.

- The District must collect the appropriate QC samples, such as matrix spike and matrix spike duplicate and train its staff to be familiar with the field guidelines, procedures, and the laboratory SOP included in the project QAPP.

Please review the attached memorandum and checklist. The District will need to submit its next AMR by 1 March 2011, and ensure that it complies with the requirements.

If you have any questions or comments regarding the review, or need any further information, please contact Chris Jimmerson at (916) 464-4859.
